15 responses

### Families have multiple opportunities to engage in school activities.

15 responses

### Students have multiple opportunities to receive additional academic support in reading, writing, math, science, and social studies. (You may want to consider each subject as its own question)

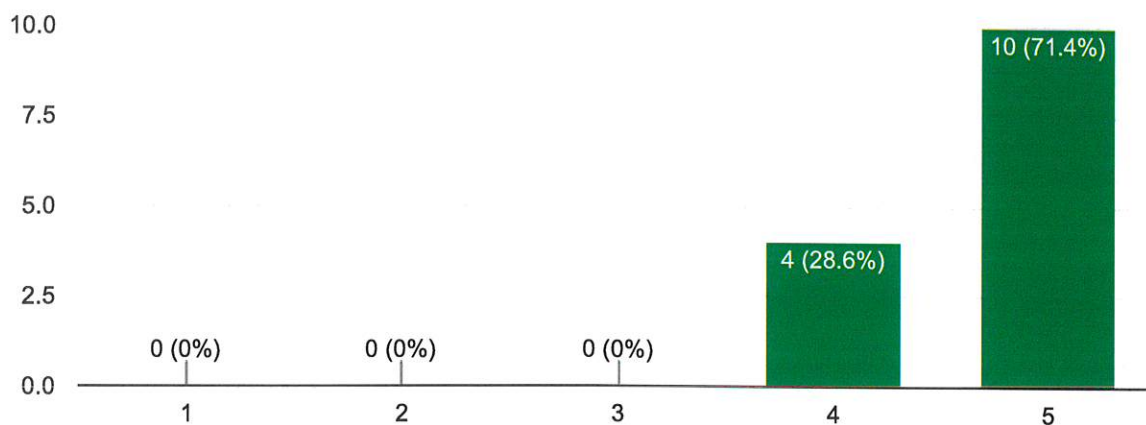

14 responses

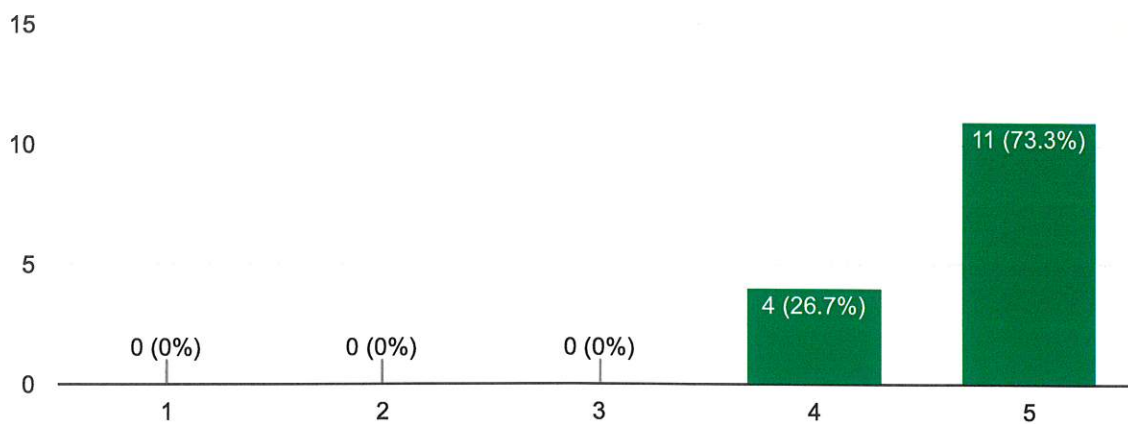

The school provides a safe learning environment for students.

14 responses

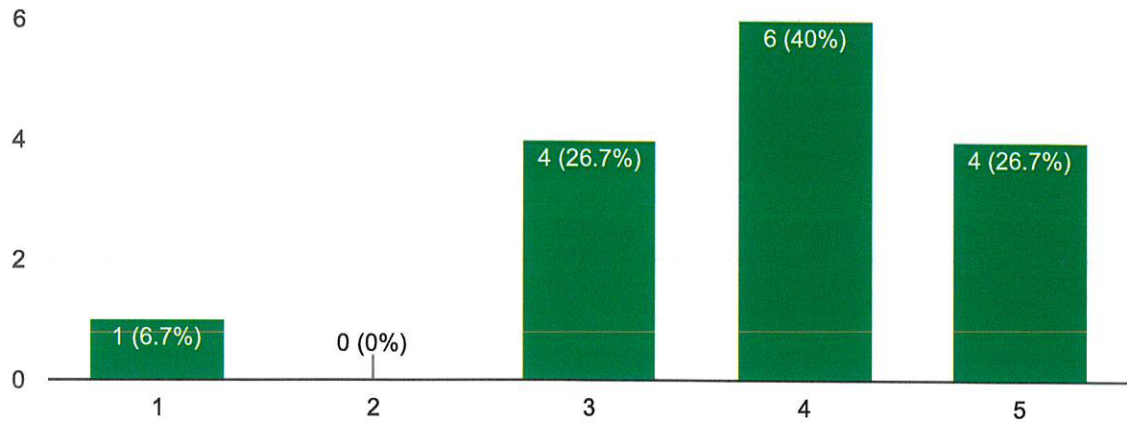

Students have the appropriate amount of materials and technology at school to be successful.

15 responses

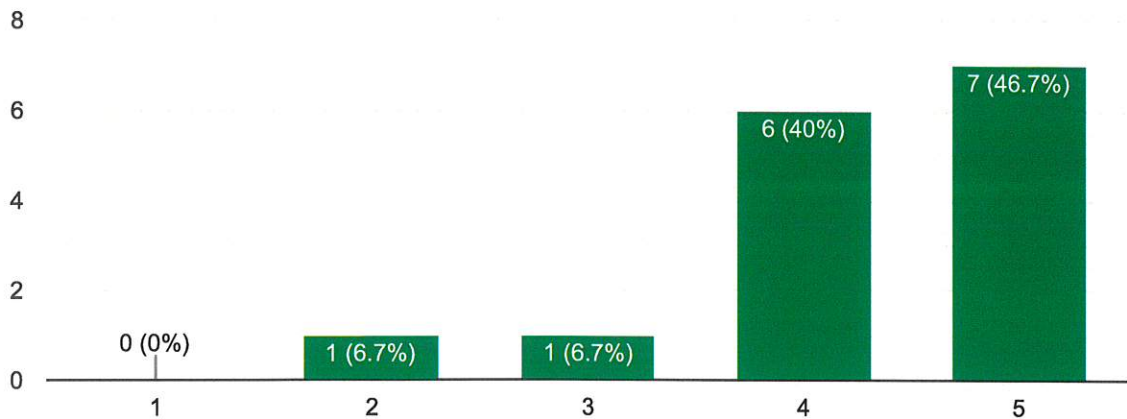

Students have the appropriate amount of materials and technology at home to be successful.

15 responses

The school has clearly articulated measurable goals for improving student achievement.

15 responses

When considering students and student achievement results across our school, what works?

8 responses

PLC meetings, coffee with the principal, ELD focus and trainings, workshops

Clear goals across grade levels.

Tutoring, small group instruction, one on one support, aids in the classroom (extra help by trained professionals).

student receive additional help when needed.

motivation/incentives

good communication on an individual level

With online learning communication with parents/families is very important. I feel that we as staff members have been good with communication to our

Providing ample opportunities for the students to share orally their understanding of Read Alouds, Shared Readings, Mathematical Thinking, and Science Concepts.

In your opinion, what needs to be improved to increase student achievement our school?

8 responses

more training for tk4

Teacher input and training.

Students would benefit from more small group and one to one support, more people (trained) to work with students in the classrooms.

More interactive lessons involving field trips

continue to tutor students that need the help.

access to materials/technology at home

communication and understanding of learning styles of individuals

During the designated ELD time continue assisting students who are at beginners as well as intermediate levels.
